72nd & Maple Intersection Improvements

Underneath our streets is a maze of utilities and other infrastructure. All Public Works projects include coordination with the local utility companies to include communications, gas, water, electricity, sewers, etc.

Prior to the 2020 start of construction for the 72nd & Maple Intersection Improvements Project, utility companies will be relocating and replacing their infrastructure. We realize that this will cause traffic disruption in the area, and want to make you aware of the timeline, and reasons for these delays.
